

The Clear Choice... for Your Pet's Healthy Joints

BiovaPlex has been clinically proven to support your pet's health in these 3 key areas:

Healthy Coat

Supports healthy skin and coat in pets

Joint Support

Increased activity in within 7 days

Protection

Reduces free radicals and oxidative damage associated with aging joints

BiovaPlex water soluble egg membrane (WSEM) supports pet's health and wellness and offers elemental building blocks to support essential joint and skin health needs.

Our patented process maintains the natural ratios of nutrients found in egg membrane, and creates a water-soluble, formulation-friendly ingredient.

BiovaPlex Scientific Support

- BiovaPlex alone showed a 44% improvement in joint mobility in 2 weeks, and 61% in 4 weeks
- When combined with existing supplementation of glucosamine and omega-3 fatty acids, BiovaPlex showed an increase in improvement over the existing supplementation - suggesting that BiovaPlex has a different mechanism of action
- Whether taking BiovaPlex alone or in conjunction with another joint care supplement, dogs will experience improved joint mobility

BiovaPlex water soluble egg membrane (WSEM) provides proven elemental building blocks to support joint and connective tissue health as well as overall skin and coat health.

The Amazing Actives of Egg Membrane

Formulating with BiovaPlex®

Rich in available, measurable nutritional components, WSEM is commercially available to formulators as an ingredient—BiovaPlex®. BiovaPlex is manufactured using a gentle process of hydrolysis to achieve the optimal molecular weight, protein, collagen and elastin levels and to ensure the lowest possible odor, color and ash. All of Biova's ingredients are quality manufactured according to cGMP standards.

BiovaPlex is ideal for multiple delivery applications:

- Water soluble for multiple delivery options
- Canine, feline, and equine friendly
- High palatability - friendly taste profile
- Low inclusion rates - easy formulation
- All natural - high protein
- 100% made in the USA

Ingredient Profile

Solubility:	10% sol. @25
Total Protein:	≥85%
Arsenic:	<2 ppm
Lead:	<10 ppm
Cadmium:	<2 ppm
Mercury:	<0.10 ppm

Product Specifications

CAS:	227025-36-6
Product Source:	Egg Membrane
Molecular weight:	≥3000 kDa
Form:	Spray-dried powder
