

Curcumin 95

Research Support

Numerous published studies showing health benefits.*

Certifications

Kosher and Halal Certified

GMO-Free

Curcumin 95 is a GMO-Free food-based ingredient.

Why is Curcumin Important?

Curcumin is a highly beneficial compound derived from the common kitchen spice, turmeric (*Curcuma longa*), and its recorded use dates back thousands of years. The active components in turmeric are polyphenolic compounds called curcuminoids. The primary curcuminoid is curcumin. Our featured curcumin product contains 95% curcuminoids, making it a highly concentrated source of these compounds which have been shown to provide a wide range of health benefits.⁽¹⁾

Balancing Inflammation

Curcumin has been shown in multiple published research studies to help promote a healthy inflammatory response to the stresses and strains caused by physical activity and exertion. It has been shown to modulate the cytokines and biomarkers that are crucial for normal self-healing.

Supporting Joint Health

Research also supports curcumin's ability to safely and effectively improve joint comfort.^{(7-11)*}

Supporting Brain Health

Recent studies show that curcumin also possesses cognitive-enhancing properties that may support brain health.^{(12-18)*}

Antioxidant Capabilities

Curcumin possesses significant antioxidant capabilities, which have been demonstrated in multiple trials. These studies have shown that curcumin can improve several indicators of oxidative status and serum SOD activity.^{(5,19-20)*}

Curcumin Powder - 95%

Characteristics

| | |
|--|--------------------------|
| Appearance | Free flowing powder |
| Color | Yellow to Orange |
| Odor & Taste | Characteristic/Aromatic |
| Assay (Total Curcuminoids by HPLC) | 95-97% |
| Particle size | Min. 90% through 80 mesh |
| Bulk density | 0.3 to 0.6 g/ml |
| Loss on drying | 5% Max. |

Applications

Capsules, tablets, powder mixes, sachets, chewables.
