

Mother Nature's Goodness for Better Pet Health

Colostrum is Mother Nature's "first food" for all mammals. It is vital for newborn development and to educate the naïve immune system. Recognized as a super food, colostrum has been used throughout history to maintain the health, vigor and youthfulness by supporting the immune system and digestive tract in both the young and young at heart.

Since 2008, our FDA Food Grade production facility has produced the market's highest quality colostrum products. Zinpro uses unique processes to deliver the highest quality colostrum designed to help improve passive immunity and support GI health. The Zinpro PathWhey™ process gently removes non-immune colostrum components, such as fat and casein, and concentrates the nutrient-dense whey fraction. Our concentrated Whey fraction contains naturally-occurring immunoglobulins, growth factors, and natural anti-microbial properties found in Nature's best food.

Benefits of Premolac® DC 50 Colostrum for Pets

- ▶ Supports healthy immune and helps modulates inflammation
- ▶ Promotes healthy GI balance for sensitive stomachs
- ▶ Aids in muscle recovery
- ▶ Highly soluble and stable for easy application
- ▶ Concentrated IgG (50%) content allows small dose inclusion in treats and toppers
- ▶ USA sourced and manufactured Colostrum from rBST free dairy cows

Features of Premolac DC 50 Colostrum for Pets

Premolac DC 50 contains 50% immunoglobulin G (IgG) and casein-free whey fractions, such as proline-rich polypeptides (6.5%) and lactoferrin (2%), that are concentrated by our patented PathWhey technology.

- Lactoferrin is a powerful inflammation modulator
- Lactoferrin boosts immunity and helps regulate the body's defense against pathogens
- Lactoferrin is a natural antifungal, antibacterial, and antiviral protein. By binding to viruses and bacteria, lactoferrin is able to inhibit pathogen growth and aids in GI health
- Proline-rich polypeptides help to restore balance in cellular immune functions and regulation of inflammation
- Proline-rich polypeptides may improve cognitive activity and behavior of geriatric animals

Premolac 50 Nutrient Profile

Typical Analysis

Protein.....	76%
Fat.....	1.6%
Moisture.....	4.7%
Ash.....	3.3%
Lactose.....	11.5%

Certifications and Compliances

Zinpro Performance Colostrum holds an FDA Food Facility Registration. In addition, we have earned the following certifications:

Your First Choice in Colostrum
